All of the rings used in this book are listed with our ring sizes.

All rings used were saw cut. **All of the beads in this book are specialized beads** - suppliers are listed.

The rubber rings listed in this book are our rings – supplied by us – they are actually EPDM not neoprene.

If you want to play and not buy silver and gold fill – I recommend using saw cut bright aluminum.

The suppliers listed in this book sell rings identical to ours.
